5. This Court has personal jurisdiction over Defendant because: (i) Defendant is present within or has minimum contacts within the State of Texas and this judicial district; (ii) Defendant has purposefully availed itself of the privileges of conducting business in the State of Texas and in this judicial district; and (iii) Plaintiff's cause of action arises directly from Defendant's business contacts and other activities in the State of Texas and in this judicial district.

## **III. INFRINGEMENT - Infringement of the '091 patent**

7. On February 6, 2018, U.S. Patent No. 9,888,091 ("the '091 patent", attached as Exhibit A) entitled "System and method for automating the management, routing, and control of multiple devices and inter-device connections," was duly and legally issued by the U.S. Patent and Trademark Office. Cloud Systems Holdco IP LLC owns the '091 patent by assignment.

8. The '091 patent relates to a system and method for managing, routing and controlling devices and inter-device connections located within an environment to manage and control the environment using a control client.

9. Defendant maintains, operates, and administers systems, products, and services for enabling a method for controlling an environment that infringes one or more claims of the '779 patent, including one or more of claims 1-20, literally or under the doctrine of equivalents. Defendant put the inventions claimed by the '779 Patent into service (i.e., used them); but for Defendant's actions, the claimed-inventions embodiments involving Defendant's products and services would never have been put into service. Defendant's acts complained of herein caused those claimed-invention embodiments as a whole to perform, and Defendant's procurement of monetary and commercial benefit from it.

10. Support for the allegations of infringement may be found in the chart attached as exhibit B. These allegations of infringement are preliminary and are therefore subject to change.

11. Defendant has and continues to induce infringement. Defendant has actively encouraged or instructed others (e.g., its customers and/or the customers of its related companies), and continues to do so, on how to use its products and services (e.g., method for controlling an environment, comprising establishing communication between a server and a control client) and related services such as to cause infringement of one or more of claims 1-20 of the '779 patent, literally or under the doctrine of equivalents. Moreover, Defendant has known of the '779 patent and the technology underlying it from at least the issuance of the patent.<sup>1</sup> For clarity, direct infringement is previously alleged in this complaint

---

<sup>1</sup> Plaintiff reserves the right to amend if discovery reveals an earlier date of knowledge.

12. Defendant has and continues to contributorily infringe. Defendant has actively encouraged or instructed others (e.g., its customers and/or the customers of its related companies), and continues to do so, on how to use its products and services (e.g., method for controlling an environment, comprising establishing communication between a server and a control client) and related services such as to cause infringement of one or more of claims 1-20 of the '779 patent, literally or under the doctrine of equivalents. Moreover, Defendant has known of the '779 patent and the technology underlying it from at least the issuance of the patent.<sup>2</sup> For clarity, direct infringement is previously alleged in this complaint.

13. Defendant has caused and will continue to cause Plaintiff damage by direct and indirect infringement of (including inducing infringement and contributory infringement) the claims of the '779 patent.

#### **IV. JURY DEMAND**

Plaintiff hereby requests a trial by jury on issues so triable by right.

#### **V. PRAYER FOR RELIEF**

WHEREFORE, Plaintiff prays for relief as follows:

- c. award Plaintiff an accounting for acts of infringement not presented at trial and an award by the Court of additional damage for any such acts of infringement;

---

<sup>2</sup> Plaintiff reserves the right to amend if discovery reveals an earlier date of knowledge.

- d. declare this case to be “exceptional” under 35 U.S.C. § 285 and award Plaintiff its attorneys’ fees, expenses, and costs incurred in this action;
- e. declare Defendant’s infringement to be willful and treble the damages, including attorneys’ fees, expenses, and costs incurred in this action and an increase in the damage award pursuant to 35 U.S.C. § 284;
- f. a decree addressing future infringement that either (i) awards a permanent injunction enjoining Defendant and its agents, servants, employees, affiliates, divisions, and subsidiaries, and those in association with Defendant from infringing the claims of the Patent-in-Suit, or (ii) awards damages for future infringement in lieu of an injunction in an amount consistent with the fact that for future infringement the Defendant will be an adjudicated infringer of a valid patent, and trebles that amount in view of the fact that the future infringement will be willful as a matter of law; and
- g. award Plaintiff such other and further relief as this Court deems just and proper.
